## AFTERSHAVE MISTER SPRAY

## Product Instructions

### Usage Instructions

Important note before use

- Do not turn on the switch while charging.
- Before first use, check if the battery level is sufficient.
- Lightly press the power button to turn on the device. The indicator light will illuminate in blue, and misting will begin. Press the power button again to stop spraying—at that point, the indicator light will go off and the device will turn

### Charging instructions:

- The charging indicator, located on the back, will pulse green during charging, indicating that the device is currently charging.
- When the indicator light turns solid green (steady),

### CLEANING

If you need to clean before changing cosmetics, or encounter a plugging nozzle, please refer to the following cleaning

- Please use the concave sides of the front cover of the nozzle first. Take off the front cover of the nozzle, and then remove the nozzle;

- Soak the nozzle in warm water to complete the cleaning;

- Install the nozzle first, and then install the front cover of the nozzle.

## How product works

The solution is atomized into small molecules through high pressure. When it becomes foggy, it atomizes and touches the skin, which is more easily absorbed by the skin.

## Precautions

- Please use it correctly according to the manual.
- Do not turn on the power when charging, unplug the power before picking up and use.
- After power on, no operation for 3 minutes, power protection, will automatically shut down.
- Do not use stimulating chemicals to wipe the instrument.
- Do not place in sunlight and high temperature.
- please do not soak the instrument in water or start in the water, resulting in the failure of the salver; 7, please place in a place where infants and young children can not touch.
- the product to keep charging 1 time a week, is conducive to the protection of the battery.
- the product injected into the water cosmetic is better, to avoid injecting too sticky cosmetic Avoid the nozzle clogging caused by too viscous cosmetics;
- If the nozzle is occasionally clogged, please clean the nozzle according to the cleaning process.

Made in China.
